

Arabella.Zahrt
President/Owner, Casa Bella Teambuilding Mission Trips

Arabella has already climbed the corporate ladder over the past 20 years and honed her leadership skills by working in management positions and by working on teams to construct homes in Tecate, Mexico. Her role as a leader began at the early age of 13, when she served as Treasurer for the Assistants League in Whittier, CA, and then as President of her sorority in college. Since then, she has acquired many years of management experience working as an wholesaler in the financial services industry for Van Kampen Funds, teaching, leading and supervising. With her insight into the many aspects of a leader's role, and with a service-oriented heart, she started Casa Bella Teambuilding Mission Trips to give back to the community by helping organizations learn ways to work together to their fullest potential. Arabella is the youngest of five children in her close-knit family, and although the youngest of the bunch, was always looked to as the born leader.

Ray Meltvedt
President/Owner of ClubDust Adventures

While attending Pepperdine University over 20 years ago, Ray took it upon himself to set-up the home-building mission organization called ClubDust Adventures, which he still operates to this day. ClubDust is set-up more for individual, charitable mission trips. Besides his ongoing home building duties, Ray is looked to as the #1 sales representative for Kent & Landsberg where he shines both nationally and internationally. As Arabella's oldest brother, Ray also offers his expertise to Casa Bella Teambuilding Mission trips, serving as a team leader.

Ron Strong
Superintendent, Casa Bella

Ron brings over 15 years of building management and construction experience to Casa Bella, and is a true asset in helping organize and provide team-building encouragement on each trip. His main role with the organization is to coordinate and provide general direction to participants while building the homes, as well as oversee all building safety requirements. Ron also helps the Team Captains establish work-site organization and lines of authority to complete the steps necessary to build each house within the allotted time frame.
